**Ling 440/540**
**Speech Technologies: Applied Linguistics Perspectives**

Tuesday and Thursday 11:00am-12:15pm
Faner 3512
Instructor: Shannon McCrocklin

This course will explore speech recognition and speech synthesis technologies. After developing a base understanding of how the technologies work, the course will explore applied linguistics research on the technologies including issues of accuracy for native and non-native speech and usefulness within linguistics, education, and speech and hearing science.

No prerequisites. Please contact instructor, Shannon.mccrocklin@siu.edu if you have any trouble enrolling.
